• BOX2 (Volume 2)

• Volume 1: *Star Wars* Episodes I - VI

A fabulous collector's edition of 100 postcards from around the world, showing the absolute best movie posters ever made for *Star Wars* I-VI. This wide-ranging collection showcases the actual art used at the launch of each episode, and highlights the many interesting variations that were made, especially for EPISODES IV through VI. Each deluxe postcard is accompanied by notes from Junzo Takagi, the famous author and the official translator of *Star Wars* in Japan.

• Volume 2: Concept Art

'Concept Art' is created at the very beginning of each film project, anywhere from 2 to 3 years before actual shooting commences. This sumptuous collection shows 100 examples of this Concept Art, featuring detailed production paintings which illustrate the origins of designs eventually used on the final screen versions. Of special note are the many designs produced over 30 years ago, that have only now come to life in *The Force Awakens*. Again, each deluxe postcard is accompanied by notes from Junzo Takagi, the famous author and the official translator of *Star Wars* in Japan.
